

REMARKS

In the Restriction Requirement mailed February 09, 2006, the Examiner has restricted the claims to one of the following inventions under 35 U.S.C. 121:

- I. Claims 1-9 and 12, drawn to an electronic trigger, classified in class 102, subclass 206.
- II. Claims 10 and 11, drawn to an electronic trigger, classified in class 102, subclass 221.
- III. Claims 13-16, drawn to a method for controlling an output signal to a device, classified in class 102, subclass 217
- IV. Claims 17-22, drawn to an electronically implemented method for controlling an output signal, classified in class 102, subclass 218.
- V. Claim 23, drawn to a system for controlling an output signal, classified in class 102, subclass 262.

Applicant elects, without traverse, Group I, claims 1-9, 12 and new claims 24-30. Applicant respectfully cancels claims 10-11, and 13-23 without prejudice or disclaimer, and reserves the right to reintroduce them in one or more Divisional applications at a later date. New claims depend from claims 24-30. They are similar to selected claims depending from claim 1 and are thus clearly believed to be within Group I.
